SUMMARY

Computer Engineering student (3rd year) with a strong foundation in offensive and defensive cybersecurity, systems programming, and software architecture. Proven ability to analyze enterprise threat protection architectures, deliver technical insights, and develop full-stack web applications.

EDUCATION

Istanbul University - Cerrahpasa

Expected 2028

Bachelor of Science in Computer Engineering (GPA: 2.94)

- Progressing to 3rd year in 2026.
- Elected Management Board Member at IU-Cyber (Cybersecurity Club) for the 2026-2027 academic year.

EXPERIENCE

Intertech (Teknopark İstanbul & DenizBank HQ)

Aug 2026 - Sep 2026

Cyber Security Engineering Intern (Threat Protection & Data Security)

- Delivered technical presentations to the engineering team on AI threat protection (Prompt Injection, Model Inversion) and network traffic flow dynamics.
- Analyzed and documented enterprise security topographies, focusing on SASE, CASB, DLP and SWG hybrid architectures.
- Investigated ICAP protocols and SSL inspection mitigation strategies.

Wilderness Resort (Wisconsin, USA)

Summer 2025

Attraction Attendant (Work & Travel Program)

- Operated efficiently in a fast-paced, international hospitality environment, developing cross-cultural communication and adaptability skills.

PROJECTS

Salix Team - AI Image Classification

- Co-developed an image classification AI model and implemented supporting backend logic using C# during first-year studies.

İÜC Gift Exchange Web Application

- Engineered, configured, and deployed a fully functional Secret Santa web application tailored for university students, hosted on GitHub.

Restaurant Management System (Kelebek Izgara)

- Built and deployed a restaurant website with an integrated administrative management panel on GitHub Pages.

SKILLS

Enterprise & Network Security: SASE, CASB, Forward Proxy, ICAP Protocol, SSL Inspection (Decrypt/Re-encrypt), Defense in Depth.

Data Security & Infrastructure: DLP (Symantec), Data Masking, Database Activity Monitoring (DAM), KVKK & BDDK Compliance, Active Directory, Domain Controller (DC), DNS, VPN, DHCP.

AI & Application Security: AI Protection, LLM Vulnerabilities (Prompt Injection, Data Poisoning), WAF/WAAP (Imperva), Web Application Vulnerability Analysis.

Cyber & Offensive Security: Burp Suite, Nmap, Metasploit, Gobuster, Kali Linux, OSINT.

Programming & Scripting: C++, C#, Python, SQL, Javascript, Assembly (x86 & ARMv7).

Architecture & Methodologies: SOLID Principles, Microservices, Blue-Green Deployment, Agile/Scrum.
